

BatchPay

Web-based batch processing tool used to upload and process a single file containing thousands of transactions

BatchPay reduces the time associated with individually inputting credit card transactions - One click of a button and the BatchPay automated payment system does the rest.

BatchPay Overview

BatchPay is a flexible and easy to use batch processing tool that allows a merchant to upload a single file containing thousands of individual transactions. BatchPay reduces the time associated with individually inputting credit card transactions - One click of a button and the BatchPay automated payment system does the rest.

BatchPay is uniquely tailored to meet the needs of Businesses that:

- Have an existing software system that generates a batch file of transactions to be processed
- Already store customers credit card information securely in its own systems
- Use telephone lines to communicate the transaction information to the bank today
- Want a faster way to process batches
- Want better reporting functionality on the results of batch files.

Fully Featured Payment Solution

- Secure web-browser interface.
- Easy customization of upload file format.

- Processes thousands of individual transactions in one upload file.
- Simple, easy to use interface.
- Multiple files may be uploaded sequentially.
- Account information and reports available using the Merchant Support Center.
- Track the status of your batch transactions file.
- Download reports detailing completed transaction information.
- Downloaded reports can be imported into Microsoft Excel or other applications.
- Accepts major credit card types including: Visa, MasterCard, Amex, Discover, Diners, EnRoute, and JCB
- Connected to multiple North American processors

- Additional payment tools available for: Recurring Billing, and QuickBooks compatible Data Export.

Benefits

- No need to change the way the batch file is created so no development work is required
