BatchPay lessens the time required to individually input credit card purchases. With BatchPay, just a single click of your mouse automates the entire payment process for you, which saves time and money.

What is BatchPay?

BatchPay is a modifiable, simple batch processing app that permits a merchant to upload one credit card file consisting of thousands of single transactions.

BatchPay was developed for retailers who:

- ◉ Use software to create a batch of daily transactions that are ready for processing
- ◉ Already keep their customers' credit card data safely on their own server
- ◉ Communicate transaction data via telephone to the bank daily
- ◉ Want a faster way to process batches
- ◉ Want more complete reporting on the processing of the daily batch files

HOW IT WORKS

BatchPay lessens the time required to individually input credit card sales. BatchPay automated payment system does it all with one click of your computer's mouse. Additional processing tools handle Recurring Billing and QuickBooks-friendly Data Export.
